

Beef Meal

Overview:
Beef meal is produced from **rendered beef tissues**, including meat and bones. It's an excellent source of **high-quality protein**, minerals, and amino acids, widely used in **animal feed** and **pet food formulations**.

Processing:
For UK suppliers, all production is done in **DEFRA-approved Category 3 plants**, while our European partners follow EFSA standards and are members of EFPRA, ensuring the highest levels of safety, quality, and protein digestibility across all facilities.

Customization:
Shelf life is **8-12 weeks**, extendable with antioxidants. It can be supplied in **28-tonne bulk loads** or **1-2 tonne tote bags**
