

## Salmon Meal

**Overview:**  
Salmon meal is a high-quality, protein-rich ingredient made from **rendered salmon tissues**. It is free from contaminants such as blood and other impurities and is commonly used in **animal feed** and **aquafeed**, providing a high level of protein and essential fatty acids, particularly **omega-3s**.

**Processing:**  
For UK suppliers, all production is done in **DEFRA-approved Category 3 plants**, while our European partners follow EFSA standards and are members of EFPRA, ensuring the highest levels of safety, quality, and protein digestibility across all facilities.

**Customization:**  
Shelf life typically ranges from **8-12 weeks**, extendable with the use of **antioxidants**. Packaging options include **28-tonne bulk loads** or **1-2 tonne tote bags**, tailored to meet specific needs.
